Our mission

Philosophy of the ROSS company is to provide our customers with products with unique design, which fulfillsl the highest demands of the users and also helps to increase the sales. We offer a wide range of our services, covering a creative design development, prototyping, production, installation and maintenance. We constantly follow the new trends in economy, trade and in international standards, so that we can be a reliable partner for our existing and future customers. We simply do everything for YOU to be visible!

Our best

12 years experience and tradition
Quality certificate ISO 9001:2000
Our own know-how in the creative design, development, manufacture and installation
Top specialists and qualified staff in every working position
Strong manufacture capability
Wide products range – 470 types in our serial production
High functionality, quality packaging of products
Production of individual projects and also the production of the product sets
Installation anywhere in Slovakia and abroad
High quality materials used in our production
Top-class technological mechinery
Our own transportation

ISO System

System of quality management
ISO 9001:2000

In February 2002 our company was certified for System of quality management ISO 9001:2000 by the company SGS International services EESV. On the base of successful certification we are a holder of the certificate of System of quality management ISO 9001:2000. In 2005 we have confirmed the quality of the system with recertification audit.

Basic contributions of the implementation of this system are following:
-higher quality of managing of all the compeny processes
-permanent improvement of the company, its products and services
-customer orientation
-reliability and credibility, quality

Breaking through the year 2002 our company has startet the certification process Environmental management system ISO 14001:1996

Processing and Adjustment of metals

Hydraulic press break
pressure 65 tons, length of processed material 2.5 m
Powder coating line Galatek®
effective working space 3.600 x 1.200 x 1.800/mm,
Gas oven (working space 3600 x 1200 x 1800/mm),
two cabins, one of them is continuous for long items
Milling and engraving machinery
Gerber® Sabre (working format 1250x1250mm)
Gerber® AR600 (working format 2000x3000mm)
Laser for cutting metals
Trumatic L3020 (working format 1500x3000mm),
Ability to cut sheets with this following thickness:
Structural steel 0,8 – 20mm, Steel 0,8 – 12mm,
Aluminium 0,8 – 8mm, Galvanized steel 0,55 – 1,5 mm
rectilinear motion saw STG®,
circular saw Grawle® 170,
saw for aluminium Elumatec®
semi-automatic and dot welding machines
hydraulic bending machine for aluminium extrusions
We use technical gases from the company LINDE for welding and cutting the metals

Processing and Adjustment of plastics materials

Vacuumforming press for plastic materials – 2000 x 1000/mm
working format 1900 x 900/mm
Screenprinting machinery
Milling and engraving machinery:
Gerber® Sabre (working format 1250x1250mm)
Gerber® AR600 (working format 2000x3000mm)
Saw for plastics - Gridgo® 3000
Bending machinery for plastic materials
bending of plastics in cool and hot conditions
on linear bending machines.

Screen printing

Three pieces of screen printing semi-automatic machines with following parameters
Viprotech®, working format 1 x 1,4 m
Viprotech®, working format 1,25 x 0,9 m
Atma®, working format 1,2 x 0,6 m

- screen printing inks of Printcolor brand and Wiederhold – solvent based inks,
- Excelent plastic characteristics, suitable for next vacuumforming, - UV stable, printing in CMYK colour scale or with direct colours
- two tunnels – for the final phase of colour application
- Hot-air tunnel and continuous UV tunnel with 20mt/min speed for hardening and drying out of the inks
- Printing on plastic materials, glass (mirrors, shopwindows, displays, shelves, tables), textile (flags, banners), foils (price tag, labels), metal (sheets, tables, fences, racks and displays), wood (tables, fences, racks and displays), or paper (stickers, posters)

Digital printing

Cutting plotter Mimaki® - 2 purchase
Thermotrasfer printer Gerber® Edge
Wide format digital printer JETi®
(printing width 3150mm, resolution 600dpi)
Wide format digital printer Arizona®
(printing width 1350mm, resolution 309dpi)
Digital printer Mimaki®Jv4
(printing width 1500mm, resolution 720dpi)

Neon tubes

We own the complete technology for thermic processing of neon tubes (hand bending over the flame), sintering – filling up with gas and reviviscence – drawn out neon.
Neon tubes from well known producers TECNOLUX GROUP and GLOSTERTUBE providing with wide range of colour shades (up to 80 different colour tones) and required quality for production of neon signs. Neon tubes are available from 6 to 25 mm diameter.

Installation and maintenance teams

Hydraulic lift ramp – working height 13m
Instalation vehicles- Mercedes Sprinter, 3 x Citroen Jumper
Maintenance vehicles – 2 x Škoda Pick-up
8 installation teams – possibility of increasing the number of the tems depening on a project
Lorries AVIA – 2 x

Marlboro Lights

Fascias

Fascia produced from stainless steel combined with
a PET-Gvacuum formet logo illuminated with halogen spotlights.
Used materials: brushed stainless steel, screenprinted
vacuum formed PET- G
Dimensions: 3000 x 1000 x 130 mm
Weight: 38 kg

Fascia illuminated with halogen spotlight.
The logo is vacuum formed from PMMA and the
background is produced from galvanized sheet steell with
a wood imitation film.
Dimensions: 3000 x 717 mm
Weight: 37 kg

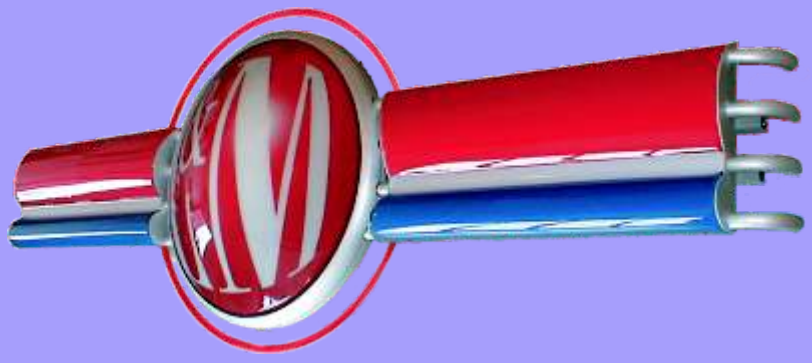

Illuminated fascia is illuminated with fluorescent lamps and electronic ballast. Marlboro lettering is made from black&white perspex. Used materials: Aluminium extrusions and sheets, alucobond, Perspex, fluorescent lamps.
Dimensions: 5400 x 980 x 800 mm
Weight: 100 kg

Illuminated fascia with a combination of fluorescent lamps and neon tubes. It can be produced also in the version with the neon tube around the logo off. Used materials: Aluminium extrusions and sheets, screenprinted vacuumformed PMMA and HPS, neon tubes and fluorescent lamps.
Dimensions: 2900 x 780 x 250 mm
Weight: 30 kg

Channel letters

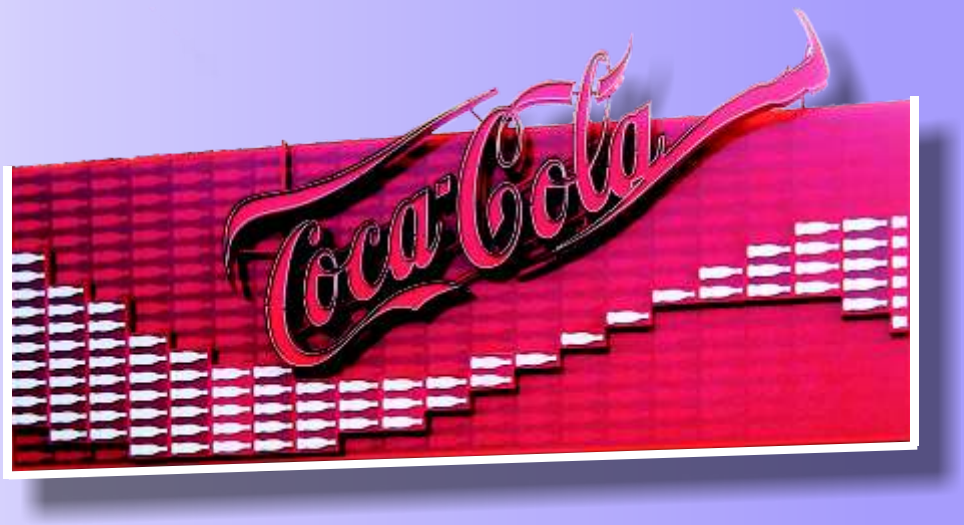

Channel letters illuminated with neon tubes installed on a steel construction.
Dimensions: 3500 x 1250 mm

Channel letters in a combination with an illuminated box.
Dimensions: 3000 x 1000 mm

Dynamic neon sign.Sequential turning on of the single parts is controlled by the electric unit and is adjustable according to customers requirements. The sequences are illustrated in the pictures on the right.
Dimensions: 10000 x 5500 mm

Double sided signs.

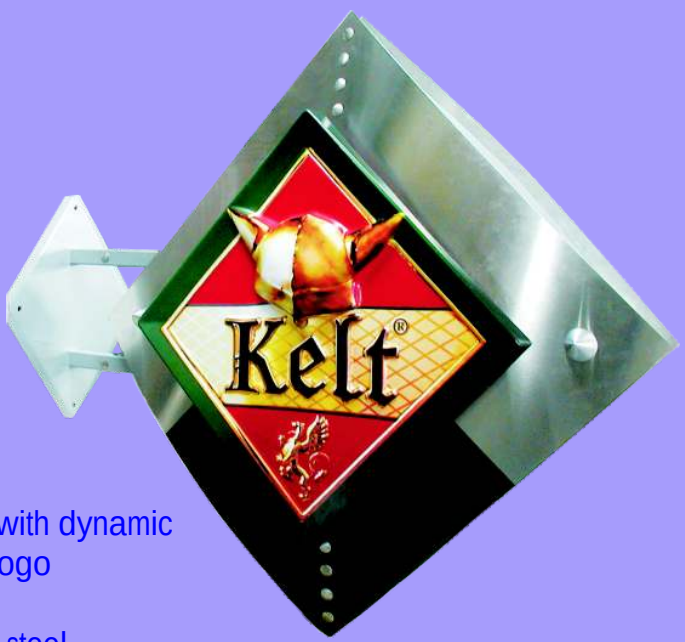

Double sided sign produced from dipped and varnished oak wood fixed in a steel frame. The logo is produced from pressed aluminium, illuminated with spotlights and compact fluorescent lamps.
Materials: dipped and varnished oak wood, pressed aluminium, steel construction
Dimensions: 850 x 700 x 100 mm
Weight: 27 kg

Double sided sign with dynamic illumination of the logo with neon tubes.
Materials: stainless steel, screenprinted vacuum formed PET-G, steel construction
Dimensions: 1100 x 990 x 340 mm
Weight: 25 kg

Double sided signs

The sign is produced as an aluminium frame combined with a screenprinted vacuumformed logos illuminated with fluorescent lamps.
Used materials: solid and vacuumformed PMMA, aluminium extrusions and sheets.
Dimensions: 1300 x 780 x 280 mm
Weight: 12 kg

The sign is produced as aluminium frame combined with screenprinted vacuumformedlogos illuminated with fluorescent lamps.
Materials: solidand vacuumformed PMMA,
Al extrusions and sheets.
Dimensions: 900 x 840 x 230 mm
Weight: 8 kg

Menu boxes

Lockable menu box is produced
from bent and pressed PMMA
on metal construction.
Dimensions: 700 x 500 x 115 mm
Weight: 8 kg

Menu boxes with changeable images
placed in snap frames.
Used materials: Aluminuim extrusions, acrylics, HPS
Dimensions: 500 x 500 mm
Weight: 4 kg

Special outdoor projects.

Material: Banner 6508
Printer: IETi 6000DPI
There are welded loops on the perimeter.
It is tighten on metal construction with tightening rubber.
Illumination: halogen spotlights

Illuminated billboard on steel foot with an aluminium cover.

Material: Banner 450 g
Dimensions: 12000 x 4500 mm

Plastic board KOMATEX 6 801E8
Plastic wrap PC 400
Printing on JETi 600DPI

Fleet graphics

Material: Banner FERRARI 650 g
Printing: Wide format printer J55i
Maximum printing width 3,15m , 600 DPI resolution

Material: AVERY 3551 - self-sealing plastic wrap suitable for pressed parts of the cars
Printing machine: JETi, 3-years guarantee for colour stability

Material: Banner FERRARI 650 g
Printing: Wide format printing machine J55i
Maximum printing width 3,15m, 600 DPI resolution

Material: AVERY 3551 - self-sealing plastic wrap suitable for pressed parts of the cars
Printing machine: JETi, 3-years guarantee for colour stability

A stands

A stand produced from
dipped and varnished oak
wood fixed in a steel frame.
The logo is pressed from
an aluminium plate.
Materials: dipped
and varnished oak wood,
pressed aluminium plate,
steel construction
Dimensions: 1350 x 620 x 120 mm
Weight: 28 kg

Screenprinted plastic board
fixed on the steel frame.
Used materials: PVC, steel pipes
Dimensions: 560 x 800 mm
Weight: 5 kg

Powder coated steel A stand .
Printing with resistant
2 component inks.
Used materials: Steel
plate - thickness 2 mm
Dimensions: 450 x 960 x 30 mm
Weight: 11 kg

Screenprinted Laminated
MDF board.
Used materials: laminated MDF
Dimensions: 450 x 950 mm
Weight: 9 kg

A stands

CC A: Screen printed vacuum formed boards in a steel frame.
Materials: Vicureen, steel tubes
Dimensions: 650 x 1050 mm
Weight: 5 kg

Stand designed in a shape of the bottle.
Dimensions: 750 x 2000 mm
Board dimensions: 420 x 650 mm
Bottle dimensions: 650 x 2000 mm
Materials: komatex, screen printing

Offer board produced from dipped and varnished oak wood fixed in steel frame. The logo is pressed from aluminium.
Materials: Dippedand varnished oak wood, aluminium pressed plate, steel frame
Dimensions: 620 x 1200 x 40 mm
Weight: 11 kg

Steel offer board with screenprinted and vacuumformed logo.
Materials: steel extrusions and plates, PET-G pressed piece
Dimensions: 870 x 920x 30 mm
Weight: 10 kg

Permanent awnings

Dimensions: 7 x 6 m
Material :Ferrari, steel construction

“Baldachin” awnings

– “Baldachin” awning
Printing: self-sealing plastic wrap
We offer also the possibility of full colour digital printing 300 up to 600 Dpi.

Dimensions:
12 x 6 m
Banner: SATLER
Printing: Thermotransfer
Automatic reeling with weather conditions sensor.

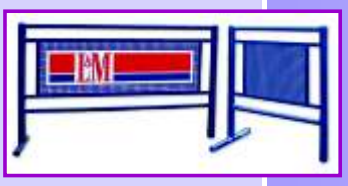

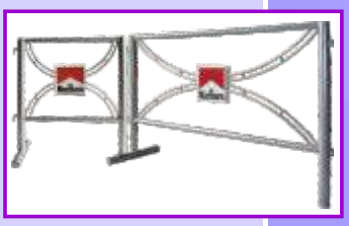

Furnishings of the terraces

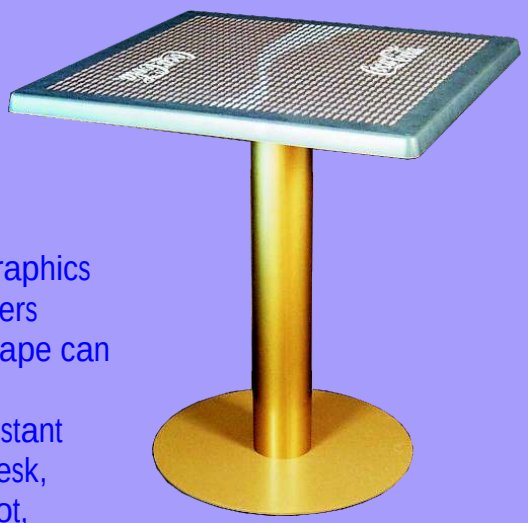

Safety glass with frosted logos are fixed to the aluminium fence. Fluorescent lamps illuminate the fence from the built in frame.
Materials: glass, Al profiles

Tables

Terrace table with graphics according to customers requirements. The shape can be round or square.
Materials: waterresistant printed desk, plastic foot, steel construction
Dimensions: 700 x 700 x 770 mm
Weight: 18 kg

Vacuumformed 3D indoor signs produced from PMMA and HPS produced in various shapes. All the images are screenprinted. Illumination: fluorescent tubes

Glass of beer – illuminated vacuumformed screenprinted acrylic
Stone – varnished foam

Classic indoor signs

Hanging poster lightbox with changeable images.
Used materials: Al extrusions, PMMA and PET-G, fluorescent lamps
Dimensions: 660 x 360 x 120 mm (930 x 360x 120 mm)
Weight: 4 kg

Combination of front and backside screen printing, creating a 3D effect.
The sign is produced from plastic materials and illuminated with fluorescent lamps.

Dimensions: 820 x 610 x 80 mm
Stainless steel sign with changeable images and the acrylic back side. The sign is illuminated from back side.

Dimensions: 650 x 650 x 80 mm
Neon imitation

Line lights

Dimensions: 400 x 400 x 30 mm
Weight: 4,5 kg
Material: stainless steel frame
Tricolor LEDs with dynamic effects.

Line lights

Stainless steel frame with engraved image into the acrylic.
Tricolor LEDs with dynamic effects.

Milled acrylic with inlaid logo.
Illumination - combination of neon tubes and fluorescent lamps.
Dimensions: 380 x 420 x 120 mm

Luminous internal advertisement, where the bubbles are made by the help of the pump in the glass of beer.
Materials: Al profiles, PMMA with printing
Fluorescent lights
liquid, pump
Proportion: 750 x 500 x 110 mm
Weight: 30 kg

Acrylic face panel and HPS back panel are glued together. The sign is illuminated with a combination of fluorescent lamps and neon tubes.
Installation: possibility to hang on a wall, or stand it on a bar desk.
Weight: 6 kg

Rotating panels

Roll up panel with eight images
in the aluminium frame.

Rotating panel with
2 changeable images.

Roll up panel with two images
printed on a textile banner
glued into endless strip.

Three pictures on one side.
Dimensions: 880 x 730 x 60 mm
Weight: 18 kg
Materials: aluminium
and steel extrusions

Dimensions: 820 x 180 x 2200 mm
Weight: 70 kg
Changeable images -8pcs ,
aluminium frame

This product has been developed
for a dynamic presentation
of various types of products,
text and graphic images which
are inserted in acrylic holders
and fixed to vertical rotating stainless
rods. The images rotate in 4 steps
Dimensions: 1145 x 1580 x 70 mm
Weight: 16,5 kg
Input: 4 W

Roll up panels for sports halls and football stadiums
Dimensions: 3000 x 800 x 200 mm
Weight: 70kg
Aluminium construction with changeable posters with
dimensions of 2910 x 680 mm

Boards and poster frames

Aluminium screenprinted pressed board.

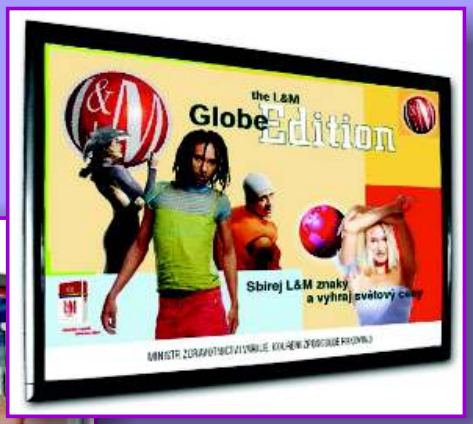

Screenprinted vacuumformed HPS menu board

Branded mirror in a frame.

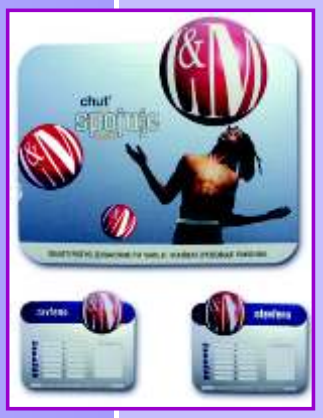

Screen printing stickers for different uses – single or double-sided.

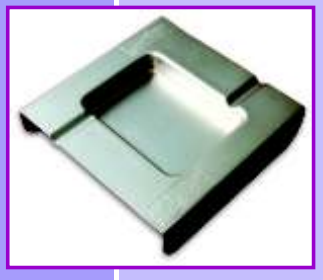

Money mats, ashtrays, holders.

Small holders, stickers for different purposes, made from plastic, metal, wood and other materials.

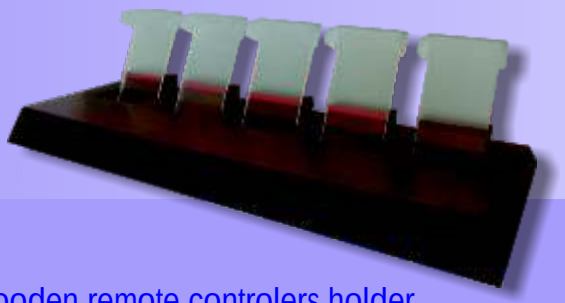

Money mats, ashtrays, holders

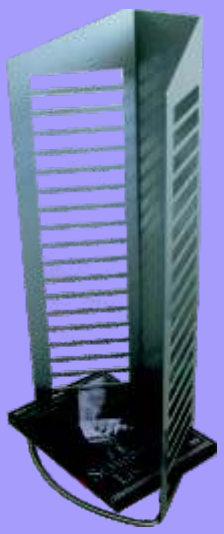

Money mats made from aluminium extrusions with changeable images.

Wooden remote controlers holder.

Steel CD and DVD holder.

We provide a wide range of outdoor and indoor orienting systems.
Materials: plastic, metal, glass

Posters holders

Cigarette dispensers

Cigarette dispenser.
Used materials: dibond, PMMA,
steel base plate
Dimensions: 260 x 110 x 470 mm
Weight: 3 kg

Bar dispensers produced according
to customers requirements.

Sales promotional displays.
Materials: metal, plastics
Various kinds and sizes

Laser cut and glued acrylic holder

Self-service steel display.
Dimensions: 400 x 490 x 900 mm
Weight: 5 kg

Cash desk cigarette dispensers

Promotional tables

Promotional table with 3D logo.
Materials: screenprinted
PMMA desk,
vacuumformed HPS, steel feet, GRP base.
Dimensions: 835 x 1000 x 600 mm
Weight: 18,5 kg

Multimedia POP displays

Multimedia car radio display swith electronic equipment. The displays have been produced according to customers requirements.
Materials: GRP, plastics, aluminium, DIBOND

Dimensions: 4500 x 5000 x 4500 mm
“Selling point” – promotional and selling stand, used on discos and promotional activities. The stand is luminous and portable. Vacuum formed plastic panels are fixed to the construction made from aluminium extrusions and steel frames..Stand includes poster lightboxes and cigarette suspensers with mechanical feeders. Racks and shelves are made from safety glass.
Materials: aluminium, steel, glass, PMMA, PET – G, Vikureen Fluorescent lamps and LED lighting.

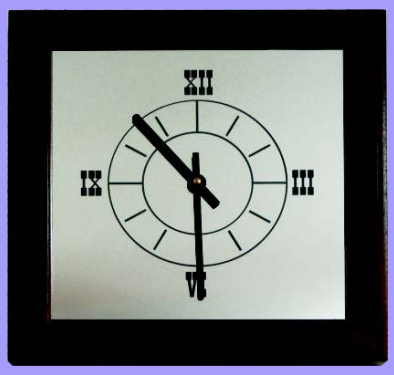

Analogue clocks

Pylons

Illuminated pylons produced for gas stations with mechanical or electronic displays for the visualization of fuel prices.
